

KHALED ALZEER

AI & Data Science Student

Amman, Jordan | +962 791 139 710 | kalzyr61@gmail.com | linkedin.com/in/khaled-alzeer-60787b322 | github.com/khaledAlzeer | khaledalzeer.github.io/portfolio

SUMMARY

Fourth-year Artificial Intelligence and Data Science student at Al-Zaytoonah University of Jordan, in the final year of study, focused on Machine Learning, Natural Language Processing, Computer Vision, and Generative AI. Experienced in Python development, data analysis, and data visualization, with supporting full-stack skills for turning models into working applications. Currently expanding deep knowledge in LLMs and Transformers while bridging software engineering with AI/ML, backed by 70+ GitHub repositories and 50+ completed projects. Actively seeking internship or junior opportunities in AI, Machine Learning, or Data Science.

EDUCATION

Bachelor of Science — Artificial Intelligence & Data Science

2023 – Present

Al-Zaytoonah University of Jordan (ZUJ) — Amman, Jordan

Currently in 4th Year (Final Year) · Expected Graduation: 2027

TECHNICAL SKILLS

Machine Learning & AI: Scikit-Learn, Regression, Classification, Clustering, Deep Learning (ANN, CNN), Natural Language Processing (NLP), Computer Vision, Generative AI, XGBoost, Random Forest, Decision Tree, Naive Bayes, Support Vector Machine (SVM), k-Fold Cross-Validation, Feature Engineering

Data Science & Analytics: Pandas, NumPy, Matplotlib, Seaborn, Plotly, Data Analysis, Data Visualization, Power BI, DAX, Power Query

Programming Languages: Python, Java, JavaScript, SQL, R

Databases: PostgreSQL, SQLite, SQLAlchemy

Web Development: Flask, Django, React, Node.js, Express.js, REST APIs, Bootstrap 5, HTML5, CSS3, EJS, Axios

Automation: Selenium, BeautifulSoup, Web Scraping, Tkinter

Tools & Platforms: Git, GitHub, Jupyter Notebook, Google Colab, VS Code, PyCharm, Postman, Microsoft Excel

PROJECTS

ML Classification Model Selection

github.com/khaledAlzeer/ml-classification-model-selection

- Implemented and compared 7 classification algorithms including Logistic Regression, SVM, KNN, Decision Tree, Random Forest, Naive Bayes, and XGBoost on the Breast Cancer Wisconsin Dataset
- Evaluated models using accuracy scores, confusion matrices, and classification reports achieving up to 97% accuracy
- Applied data preprocessing, feature scaling, and train-test split best practices
- Technologies:** Python, Scikit-Learn, Pandas, Matplotlib, NumPy

ML Regression Model Selection — Power Plant Dataset

github.com/khaledAlzeer/ml-regression-power-plant

- Built and compared 5 regression models including Linear Regression, Polynomial Regression, SVR, Decision Tree, Random Forest, and XGBoost on a real-world power plant energy output dataset
- Evaluated model performance using R-squared score and RMSE, achieving an R^2 of 0.96 with XGBoost
- Generated comprehensive visual performance comparison reports using Plotly
- Technologies:** Python, Scikit-Learn, NumPy, Pandas, Plotly

Breast Cancer Classification — Logistic Regression

github.com/khaledAlzeer/logistic-regression-breast-cancer

- Developed an end-to-end binary classification pipeline with data preprocessing and feature scaling
- Applied k-Fold cross-validation (k=10), achieving consistent accuracy across all folds
- Generated detailed evaluation metrics including precision, recall, F1-score, and ROC curve
- Technologies:** Python, Scikit-Learn, Seaborn, Pandas, Matplotlib

NLP Linguistic Semantic Studio

github.com/khaledAlzeer/nlp-linguistic-semantic-studio

- Built an interactive NLP reference website covering lexical, morphological, syntactic, semantic, and pragmatic analysis levels
- Implemented practical examples for tokenization, stemming, lemmatization, POS tagging, parsing, and Named Entity Recognition using NLTK and spaCy
- Documented a complete NLP pipeline including Word Sense Disambiguation and VADER-based sentiment analysis with cheat sheets for each stage
- **Technologies:** Python, NLTK, spaCy, HTML5, CSS3, JavaScript

NLP — Restaurant Reviews Sentiment Analysis

github.com/khaledAlzeer/nlp-sentiment-analysis-restaurant-reviews

- Built a sentiment classification system for restaurant reviews using text preprocessing and a Bag of Words model
- Compared Naive Bayes and Random Forest classifiers, selecting Random Forest for its higher precision (0.88) in minimizing false positives
- Evaluated models using accuracy, precision, recall, and F1-score with confusion matrix visualization
- **Technologies:** Python, NLTK, Scikit-Learn, Pandas, NumPy

AI Meeting Minutes Generator

github.com/khaledAlzeer/ai-meeting-minutes-generator

- Built an AI application that transcribes meeting audio/video using OpenAI Whisper and generates structured meeting minutes using Meta Llama 3.2 3B Instruct
- Designed a layered, service-oriented architecture separating UI, business logic, and model services with GPU-aware inference and 4-bit quantization
- Deployed the application as a cloud-hosted Gradio app on Modal with an automated pytest test suite
- **Technologies:** Python, Whisper, Llama 3.2, Gradio, Modal, FFmpeg

BookTracker — Full-Stack Web Application

github.com/khaledAlzeer/BookTracker

- Built a full-stack book tracking application with complete CRUD operations and a PostgreSQL database
- Integrated the Open Library API for automatic book cover image fetching by ISBN
- Designed and managed a relational database schema with user-specific book records
- **Technologies:** Node.js, Express.js, PostgreSQL, EJS, REST APIs

Node.js Blog REST API

github.com/khaledAlzeer/nodejs-complete-blog-api

- Developed a complete RESTful Blog and Notes API with full CRUD endpoints
- Implemented a two-server architecture separating the API backend from the frontend client
- Used Axios for HTTP communication between servers with error handling middleware
- **Technologies:** Node.js, Express.js, Axios, EJS, REST APIs

Family Travel Tracker

github.com/khaledAlzeer/FamilyTravelTracker

- Developed a multi-user travel tracking application to visualize visited countries per family member
- Built dynamic user profile switching with per-profile country data stored in PostgreSQL
- **Technologies:** Node.js, Express.js, PostgreSQL, EJS

Additional projects and source code available on GitHub: github.com/khaledAlzeer

CERTIFICATIONS

Machine Learning A-Z: AI, Python, R & AWS

2026

Udemy · Kirill Eremenko & Hadelin de Ponteves

- Regression, Classification, Clustering, Association Rule Learning, Reinforcement Learning, NLP, Deep Learning (ANN/CNN), Dimensionality Reduction, XGBoost, AWS SageMaker, Python, R

Microsoft Azure AI Fundamentals (AI-900)

2026

Microsoft

- Azure AI, Machine Learning Concepts, Computer Vision, NLP, Generative AI, Cloud Computing

The Complete Web Development Bootcamp <i>Udemy · Angela Yu</i> HTML5, CSS3, JavaScript, React, Node.js, PostgreSQL, REST APIs, Bootstrap, Express.js	2025–2026
Microsoft Power BI Desktop for Business Intelligence <i>Udemy · Maven Analytics</i> Power BI, DAX, Data Modeling, ETL, Dashboards, Power Query, Data Visualization	2025
100 Days of Code — Python Pro Bootcamp <i>Udemy · Angela Yu</i> Python, Flask, Web Scraping, Pandas, NumPy, Matplotlib, Tkinter, REST APIs, SQL	2024

LANGUAGES

Arabic — Native English — Professional Working Proficiency

ADDITIONAL INFORMATION

GitHub Activity: 70+ public repositories · 50+ projects built · 35+ technologies used
Open To: Internships · Junior AI/ML roles · Junior Data Analyst roles · Freelance projects
Competitive Programming: Active on Codeforces — codeforces.com/profile/Khaled_Alzeer05
Interests: Machine Learning · Natural Language Processing · Computer Vision · Generative AI · LLMs
